

Connecting a Nook to UNOSECURE

The Nook Tablet is equipped with Wi-Fi (wireless) network connectivity. Please use the following steps to connect to UNO's campus-wide unosecure wireless network.

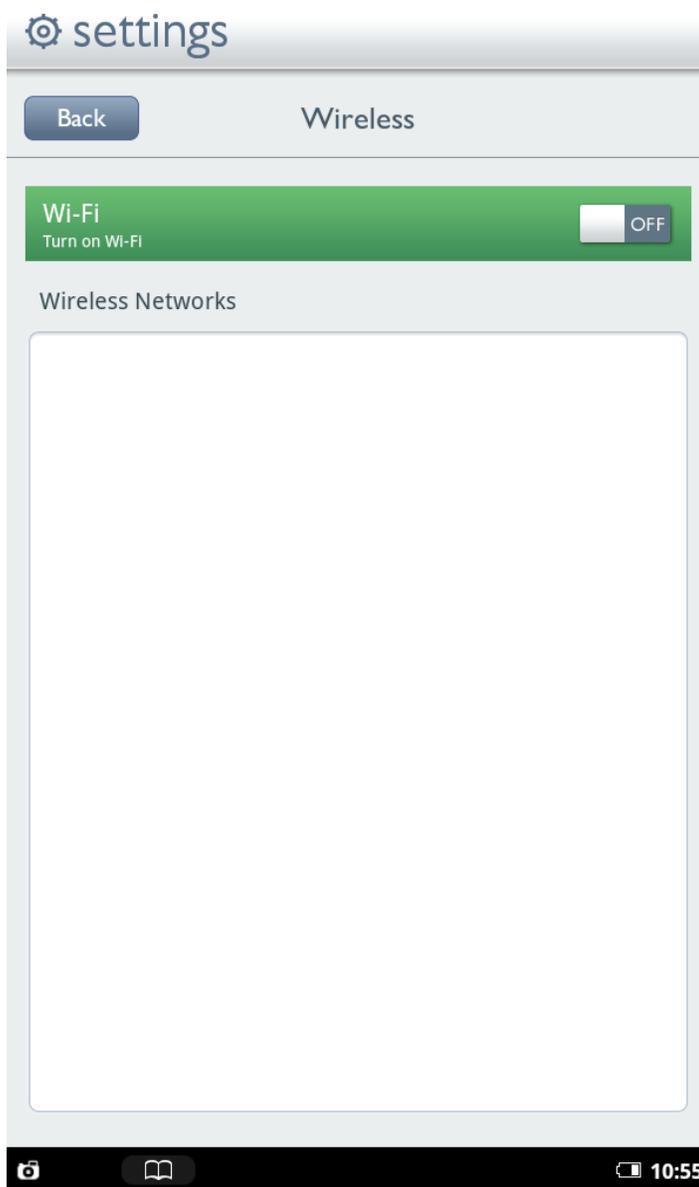

1. On your Nook Tablet, go to the options screen by clicking the Nook Symbol button towards the bottom of your device. Select the **Settings** icon.

2. Select **Wireless**.

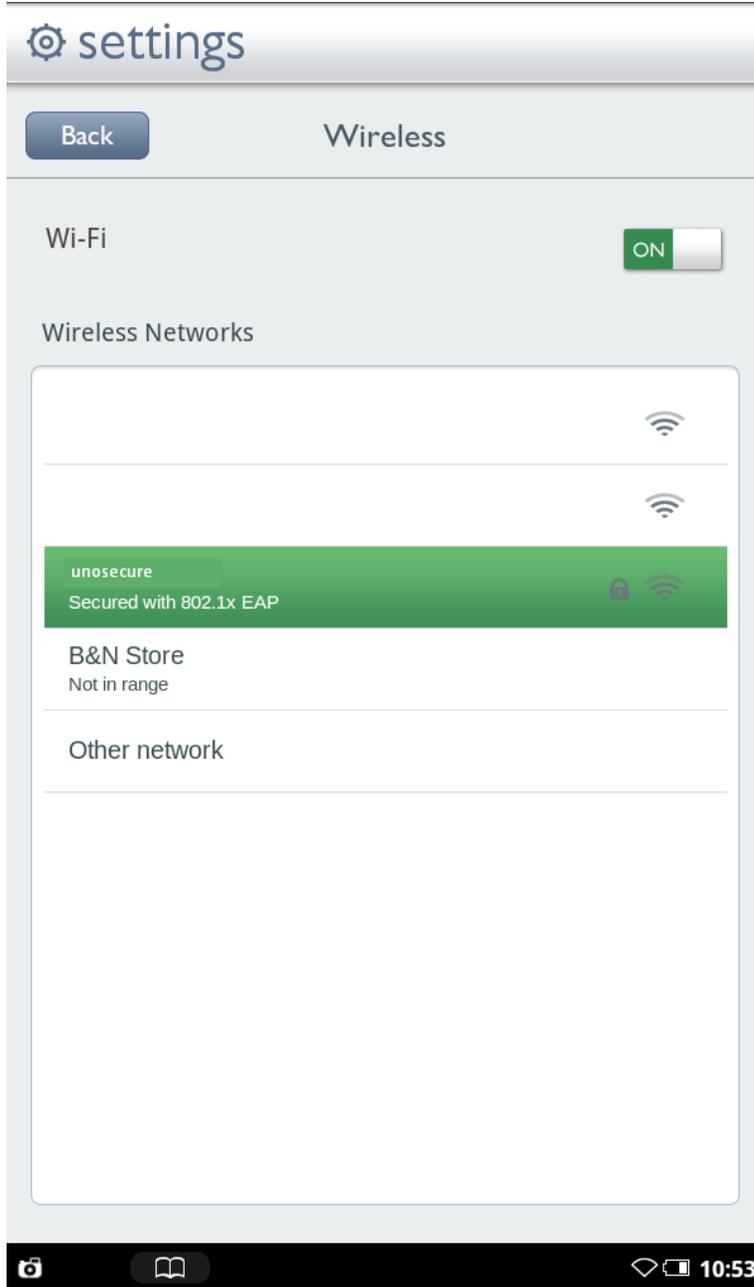

3. If "Wi-Fi" is turned off, select the switch to turn it from **OFF** to **ON**.

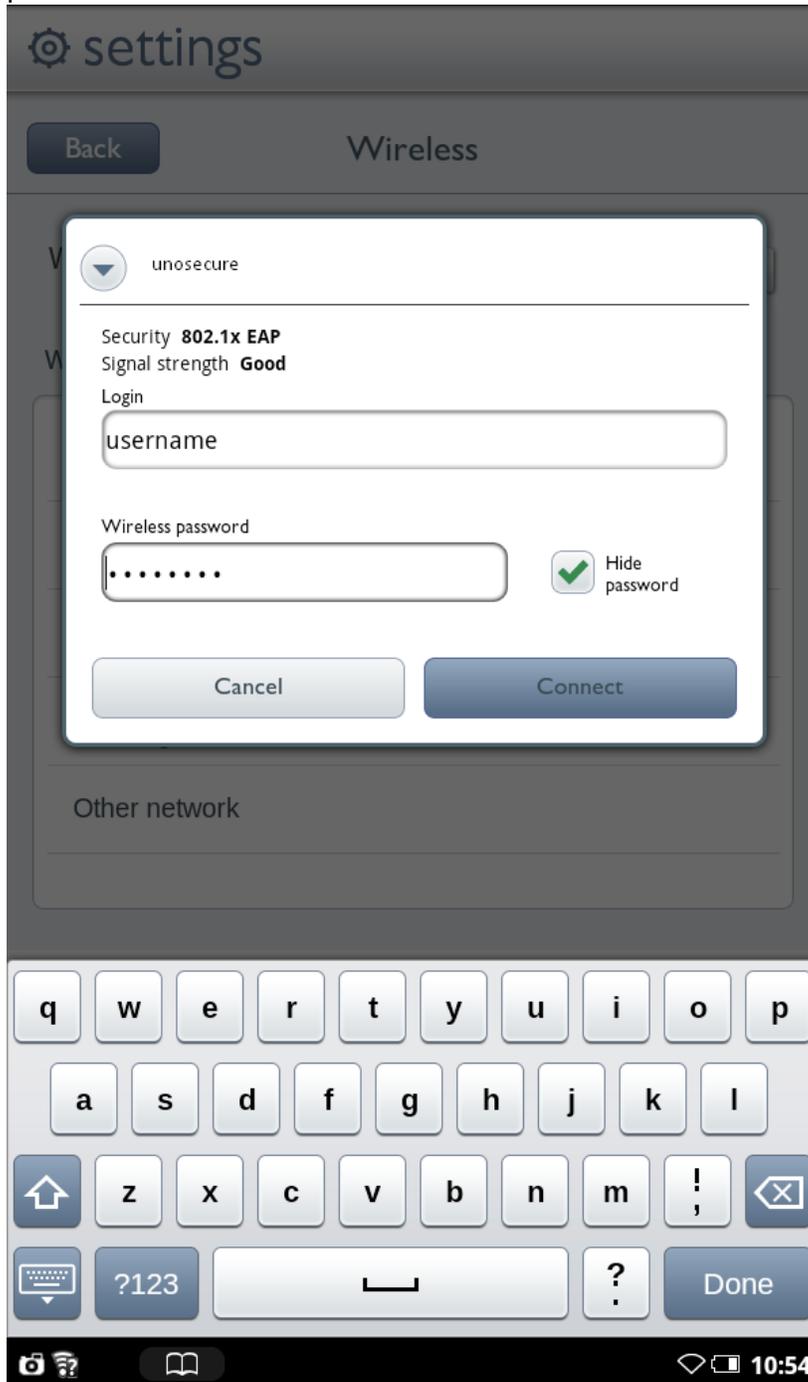

Result: Available wireless networks will be listed under "Wireless Networks".

Note: A padlock icon by a wireless network's icon indicates a password is needed to access that network.

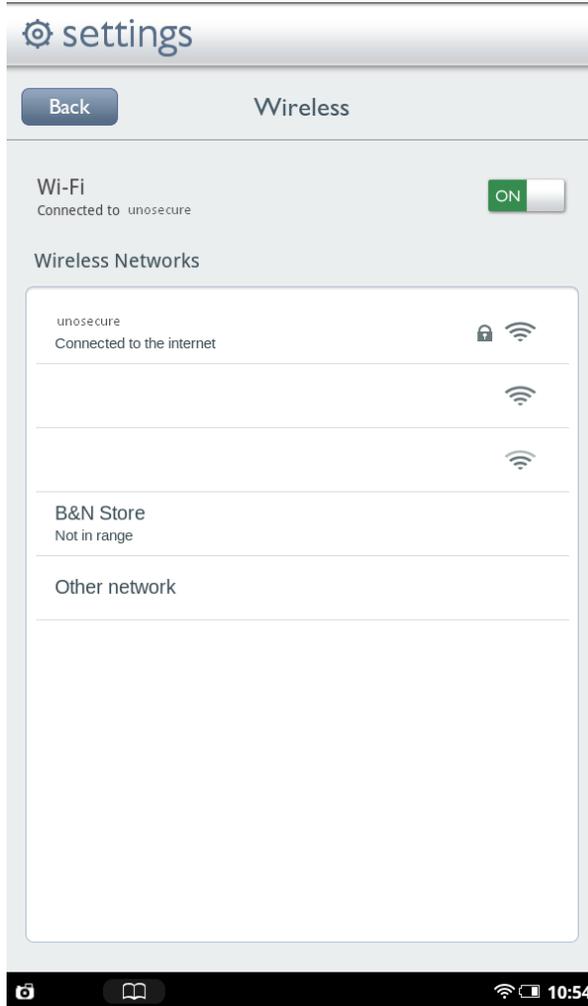

4. Under "Wireless networks", select **unosecure**.

5. Please enter your **UNO username** for "Login" and your **webstar password** for "Wireless password" and select **Connect**.

Result: After a moment, you should see the word "Connected to the Internet" under unosecure on the list of available networks, indicating that you are now connected to the unosecure network.

- To test your connection, go to the Home screen and select **Web**, and then enter the address <http://www.uno.edu>.

Result: The UNO home page should load.

If you encounter any trouble, feel free to contact the Help Desk at (504) 280-4357 or by email at helpdesk@uno.edu. You may also stop by the Help Desk, located in the UCC Room 101.
